

NiCE funding fiche: Horizon2020 -

New ICT-based solutions for energy efficiency

Call & reference	EE-11-2014\ 2015 New ICT-based solutions for energy efficiency		Deadline	5 June 2014 10 June 2015
Funding programme	Horizon 2020		EC Service	Dg Research and Innovation
Objectives	<p>The focus should be on the creation of innovative IT ecosystems that would develop services and applications making use of information generated by energy consumers (e.g. through social networks) or captured from sensors (e.g. smart meters, smart plugs, social media) and micro-generation.</p> <p>These applications range from Apps for smart phones and tablets to serious games to empower consumers stimulate collaboration and enable full participation in the market.</p> <p>The proposed solutions should be deployed and validated in real life conditions in publicly owned buildings (including administrative offices, social housing) and buildings in public use or of public interest.</p> <p>Validation should provide socio-economic evidence for ICT investment in the field and include detailed plans for sustainability and large-scale uptake beyond the project's life time.</p> <p>Specific attention should be given to development and testing of 'cleanweb' solutions, which not only bring opportunities for consumers, but also represent a promising investment field.</p>			
Expected Impact	<ul style="list-style-type: none">• Systemic energy consumption and production and emissions reduction between 15% and 30%.• Accelerate wide deployment of innovative ICT solutions for energy efficiency.• Greater consumer understanding and engagement in energy efficiency.			
Total budget for this call	2014 EUR 8.5 million 2015 EUR 8.5 million	Co-financing rate	Max. EC co-funding rate Research and Innovation Actions: up to 100% financing Contribution per project EUR 1.5 and 2 million
