

## GDC 2017 collection of case studies

Published in January 2018, the third annual collection of Green Digital Charter case studies includes 24 good practices from 21 contributing cities.

In areas such as building, energy, transport, e-participation, green ICT and waste-management, GDC signatories are leading the way in deploying digital solutions to reduce their carbon footprint and improve their citizens' quality of life.

This edition gathers inspiring and replicable solutions, as well as the most innovative projects tested in cities, including the [City-ZEN virtual power project](#). Piloted in a district of Amsterdam, this online platform was awarded best GDC project for 2017 at the 'Imagine the Urban Future' conference co-organised by GuiDanCe and EUROCITIES' Knowledge Society Forum. All participant received a copy of the publication. Read the highlights at <http://bit.ly/2nqLm7L>. Each case study includes the coordinates of a contact person, if you interested to follow-up!
